

BUSINESS ENGLISH I

WELCOME!

Welcome to the assignment *Business English I*. This course will help you understand the vocabulary and context required for implementing good communication in your workplace. As a Software Engineer, you will probably collaborate with people from other countries. Therefore, the course provides information about four main areas: Human Capital, Making Contact, Project Planning and Explaining Software. These areas will help you work worldwide successfully and will enhance your communication skills.

RECOMMENDED BOOKS

- Locker, K. O. & Kaczmarek, S. K. (2014) Business Communications: Building Critical Skills. McGraw-Hill
- Baehr, E. & Loomis, E. (2015) Get Backed. Harvard Business Review Press.

UNIT 1.
RECRUITING & HIRING

SYLLABUS UNIT 1

1.1
Job interviews

1.2
Recruitment schemes

INTRODUCTION

The objective of the course *Business English I* is to prepare the student for the real world industry. Many recruitment schemes may apply. Your first job may be in an outsourcing schema with a boss in a foreign country. Another option is to work for a big corporation with operations in many places worldwide. In any case, this first unit will help you in the process of a job interview. In particular, to identify whether the job is a good fit for you.

PROFESSIONAL COMPETENCIES

- The student will be able to explain interests, skills and desires in a job interview.
- The student will be able to convey the status of a project and the organization of its code.

JOB INTERVIEWS

A job interview is:

> A meeting in which an employer asks the person applying for a job questions to see whether they would be the right person to do that job. (Cambridge Business Dictionary)

- **If you are the employer:** the interview is the opportunity to know more about the background, skills and qualifications of the candidate you are planning to hire.

JOB INTERVIEWS

- **If you are the interviewed:** your task is to show who you are, how you would contribute to the organization and why you are the best candidate for the position.

It does not matter if you are the employer or the interviewed; **the most crucial part of the job search is the interview.**

JOB INTERVIEWS

Previously to obtain a job interview, you will need to send a resume or a CV. The primary differences between a resume and a *curriculum vitae* (CV) are length, content, and purpose.

Most ***curriculums vitae*** are personal 'marketing' documents that try to sell all the candidate's achievements.

On the other side, a **professional resume** should be as concise as possible. Typically, the length is one page long, although sometimes it can be as long as two pages.

Once you obtained the job interview, you must prepare to answer **the most common questions**. The following are some illustrations:

❑ Tell me a little about yourself...

> I am a hard-working professional with five years of experience. I'm excited to...

❑ What are your biggest strengths?

> I'm very proud of my strengths in learning new concepts and tools quickly, communicating clearly and...

- **What are your most significant weaknesses?**

> I'm very self-aware of the things that I can improve on, which some would call...

- **Why should we hire you?**

> I have all of the skills you're looking for in this role and the enthusiasm about the company...

❑ **Why do you want this job? / Why are you interested in this company?**

> I want this job because the role matches what I am looking for the next step in my career...

❑ **What motivates you?**

> What motivates me is making customers happy and...

JOB INTERVIEWS

❑ **How do you think you will fit in this role?**

> I think I would fit great into this role because I can contribute to...

❑ **What do you know about our company?**

> I know that this company is known for... and it's in the... industry...

JOB INTERVIEWS

❑ Why do you want to leave your current job?

> The main reason I'm looking to move on from my current job is that I want to develop a new skill in...

❑ Where do you see yourself in five years?

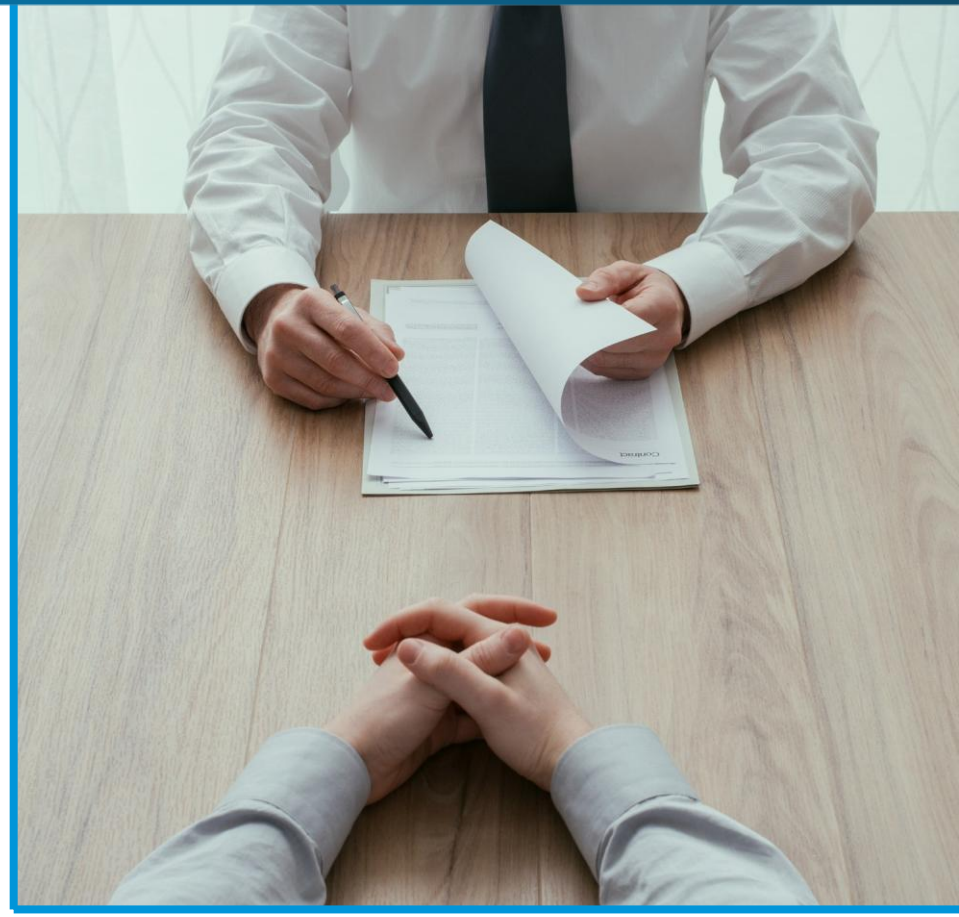

> In five years I'd like to be an established team member of a company like this where I...

❑ **How do you deal with pressure or stressful situations?**

> I deal with pressure or stressful situations by taking things one step at a time...

These are general questions in a job interview.

How confident are you that you can successfully answer them?

You must not answer with a “Yes” or “No”. The purpose of an interview is that both, you and the recruiter, feel sure that you are a good fit for the job. Some illustrations of the right answer are the following:

> I pursue this job because I know that this company genuinely cares about the people.

> I like my previous job because every day was different, challenging and exciting. No two days were the same.

> Laughing is good for my soul and my psychological well being. I can not work in a sad environment.

> I want to feel that my opinion matters, and so does everybody else’s, whatever level they are.

Besides describing your ideal job, you will need to talk about your **skills** and **qualifications**.

The **skills** are the set of abilities and capacities that enable a person to interact positively and work effectively:

Leadership

Teamwork

Flexibility

Communication

Example

Interviewer: What are your skills, Mr. Rivers?

Mr. Rivers: I communicate well. I'm good leading teams. I speak four languages, and I can manage complex projects.

Interviewer: Four languages? That's impressive!

The **qualifications** are official records that show that you have finished a training course or have the necessary skills:

Graduate degree

Work experience

Specialized training

Example

Interviewer: What are your qualifications for this job?

Mr. Rivers: I have a degree in computer science, and I've worked for several software developers.

Interviewer: Experience and education; that's a right combination!

Finally, you need to elaborate on your **personal qualities**. Qualities help a person get along in a new situation. Though skills are essential, an employer will select new employees based on their unique attributes as well. Try to describe yourself with the following vocabulary:

Ambitious: Driven to success.

Approachable: Works well with others.

Autonomous: Uses initiative.

Calm: Stays level headed in a crisis.

Cheerful: Develops a positive work environment.

Clever: Can juggle multiple tasks.

Competitive: Thrive under pressure.

Confident: Not afraid to ask questions.

Cooperative: Gets along well in a team setting.

VIDEO

Please review the following video:

Recruiting & Hiring

Creative: Thinks outside the box.

Determined: Self-motivated.

Devoted: Committed to the company's goal.

Diligent: Always works the hardest.

Efficient: Works in a well-organized and competent way.

Energetic: Able to work long and hard hours.

Enthusiastic: Puts all into every project.

Flexible: Able to adapt priorities.

Focused: Goal-oriented.

Friendly: Easy to work with.

Honest: Values integrity.

Meticulous: Pays attention to details.

Open-minded: Takes constructive criticism well.

Organized: Meticulous planner.

Patient: Not easily ruffled.

Perceptive: Can read people effortlessly.

RECRUITMENT SCHEMES

There are many recruitment schemes, and you must be clear about what you want and what you do not. Consider the following:

- **Outsourcing:** Refers to obtaining certain services or products from a third party company. Companies, essentially, look for accounting services or manufacturing of a particular input to another company. In this case, a company hires you, but you work for another one.

RECRUITMENT SCHEMES

- **Offshoring:** Refers to obtaining services or products from another country. It refers to re-locate certain aspects of a business to another country.

- **Hour-based compensation:** The company that hires you pays according to the number of hours you can justify.

- **Output-based compensation:** The company that hires you pays according to the final products or services you provide.

RECRUITMENT SCHEMES

Besides the recruitment scheme, you need to clarify the total **reward model**, which covers the following:

- **Compensation:** It includes the base salary, the variable pay and the pay progression.
- **Work environment:** It includes leadership, culture and work and life balance.
- **Personal growth:** It includes career progression, performance management and learning and development.

- **Benefits:** It includes: paid holidays, healthcare and wellbeing and pension.

There are more topics to take care of. Consider the meal breaks, paydays, sick leaves, and so on. Nonetheless, you have achieved a good understanding of the whole process. Congratulations!

LECTURES

Please review the following lectures:

Writing Business Letters

Employee Work Profile and Performance Appraisal Report

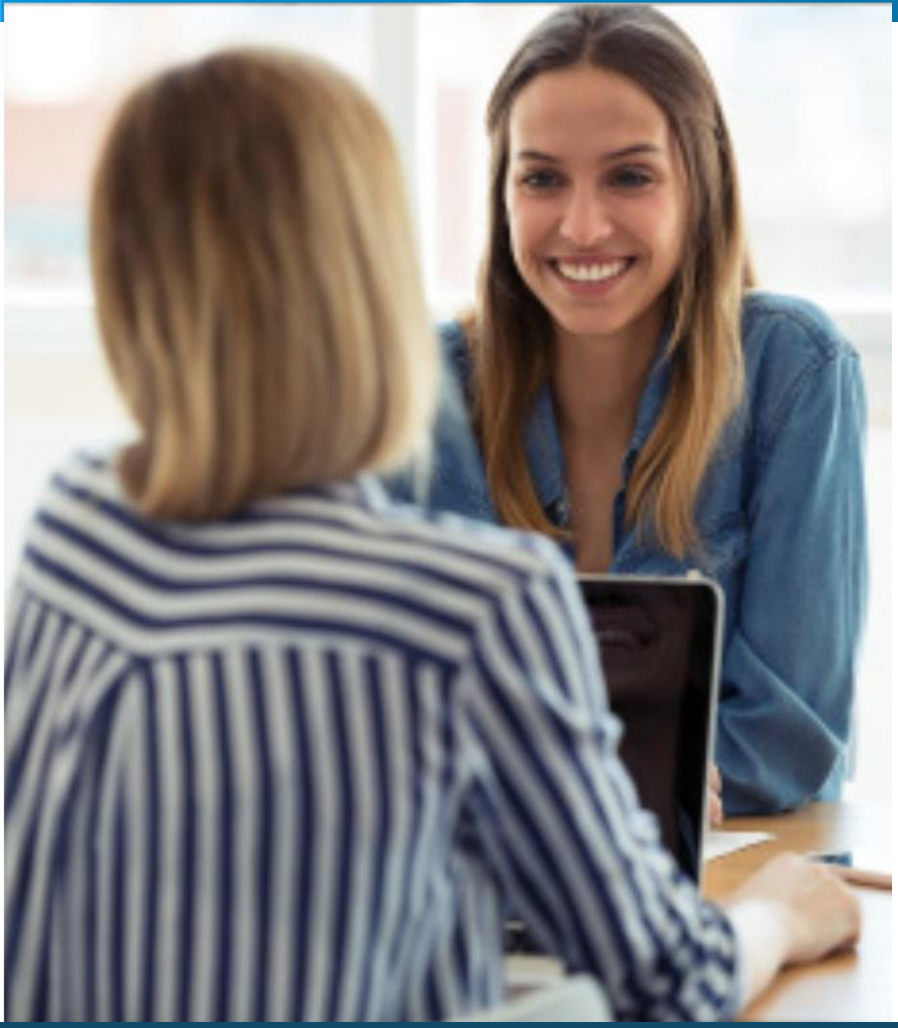

Choose the correct option in each of these sentences:

- ❑ I am great at giving instructions, that is one of my **skills** / **qualifications**.
- ❑ I can facilitate the course of Emergency Medical Knowledge. I am **skilled** / **qualified to do it**.
- ❑ I have the **skill** / **qualification** to coach my team.

Read the following paragraph and fill in the blank lines with the correct answer with the concepts inside the box:

STAFF	EMPLOYEES	MEMBERS OF STAFF

I help to recruit new _____, keep staff records and reports, help to plan _____ training and organize team-building activities. I also participate in evaluating the performance of junior _____.

FORUM 1

Working environment:

Participate in the forum by sending pictures. The pictures must provide evidence that you have Access to the free version of:

- Grammarly

Press the following button to participate in the forum:

CLOSING REMARKS

This unit describes the pillars for creating a resume, a CV and obtaining a job interview. Nevertheless, that is just the beginning. Equally important is to know the vocabulary to describe the personality and the working environment. Both, the employer and employee, will be confident of their decision for the recruitment scheme is transparent.

BUSINESS ENGLISH I
UNIT 1. RECRUITING & HIRING

CONGRATULATIONS!

You have just finished the first unit of your course Business English I. We invite you to conclude this effort by taking this unit's exam. To do that, you must go back to the main screen and click on *Presentar examen*.

UNIT 2.
MAKING CONTACT

SYLLABUS UNIT 2

2.1 Business communication

2.2 Business trips

INTRODUCTION

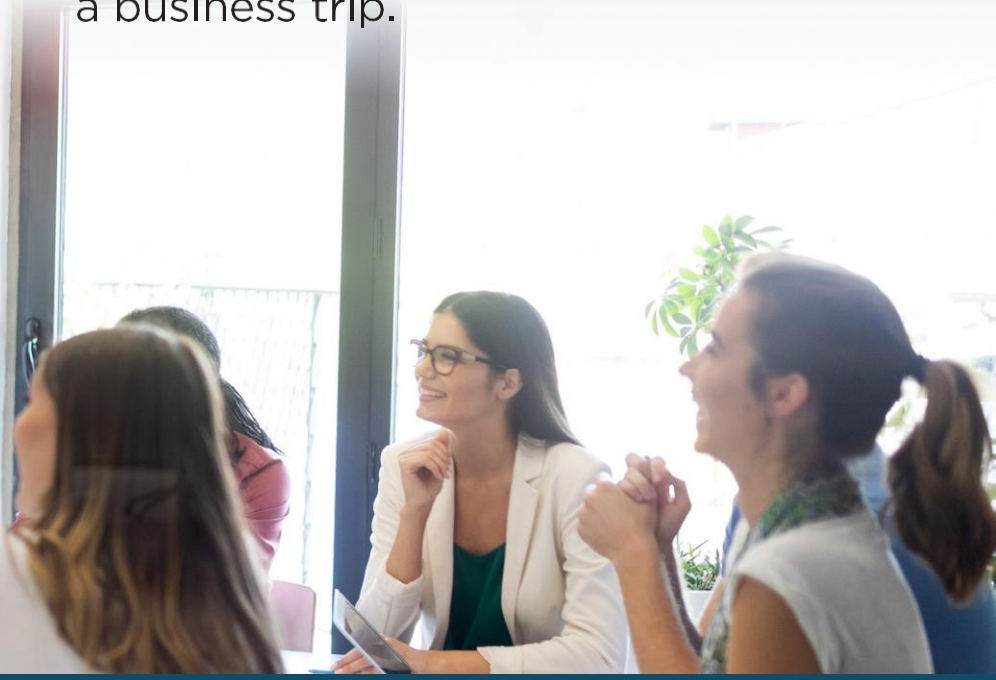

This second unit will provide you with tools to communicate yourself. In particular, you will learn ways and resources you can use to arrange meetings, conferences and even lunches to reach your goals.

PROFESSIONAL COMPETENCIES

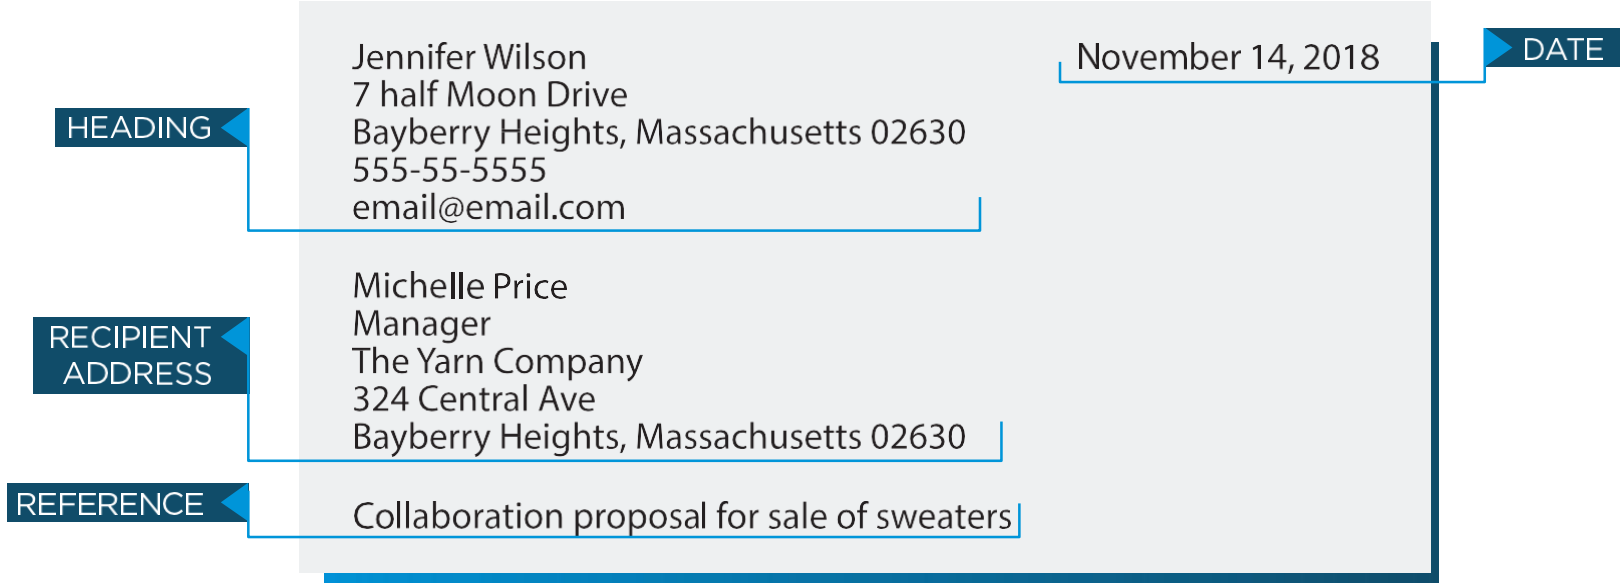

- The student will be able to convey specific ideas in a business meeting.
- The student will be able to resolve common communication problems in a business trip.

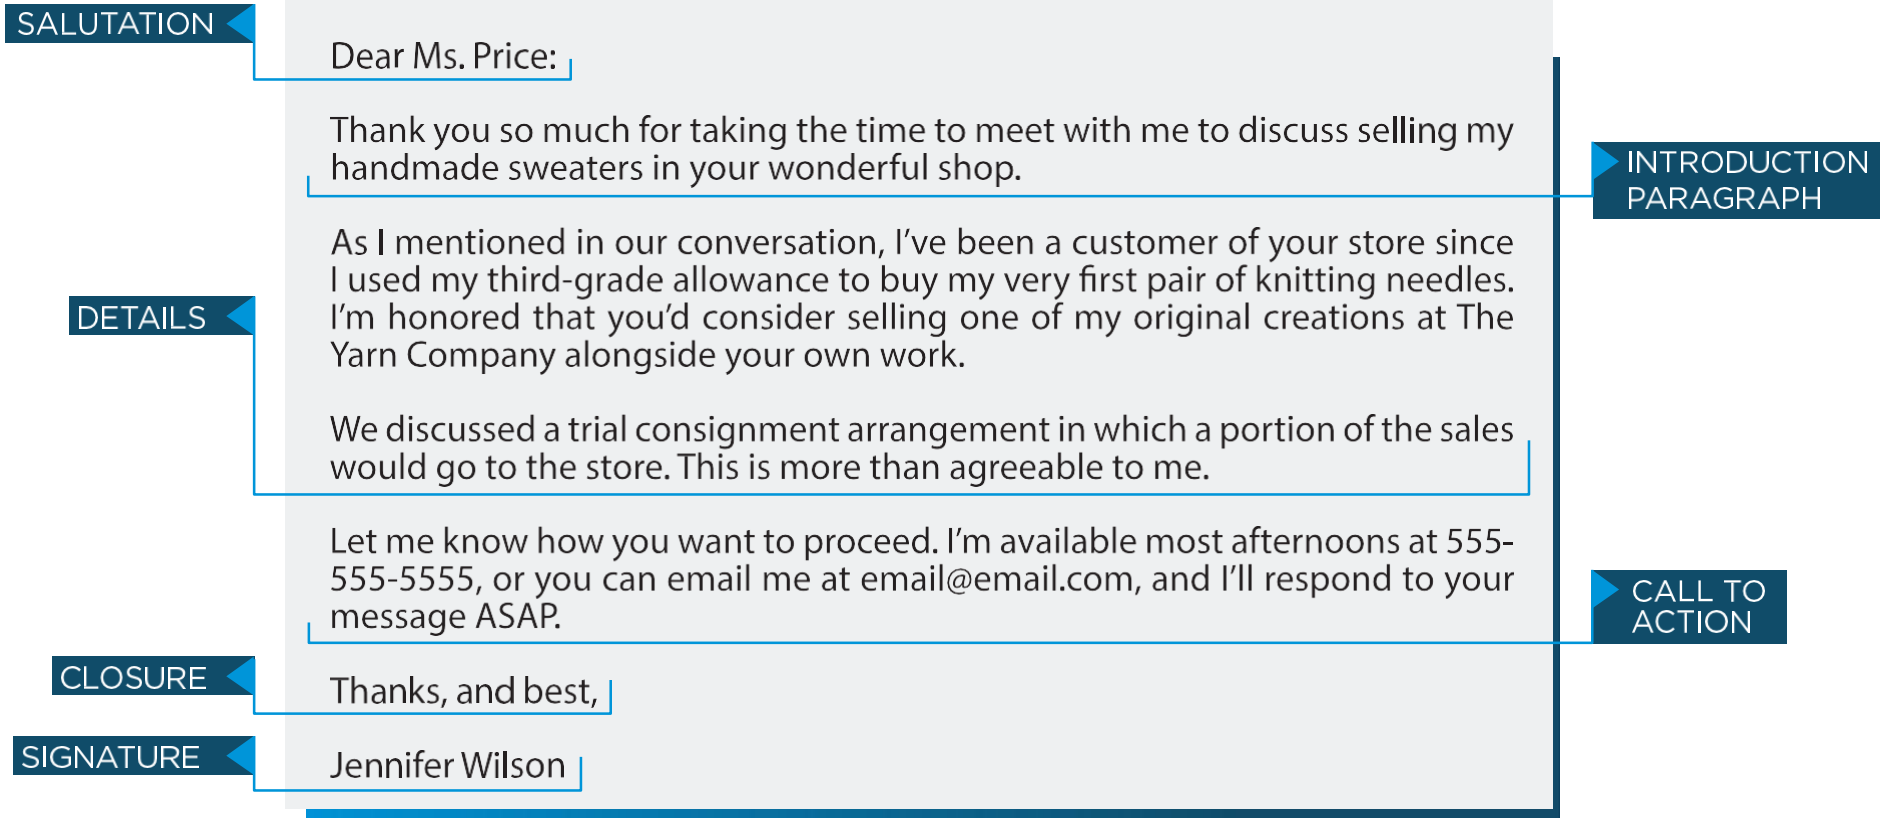

BUSINESS COMMUNICATION

In the professional world, you will often need to write a **business letter or emails**. Look at the example and identify the structure:

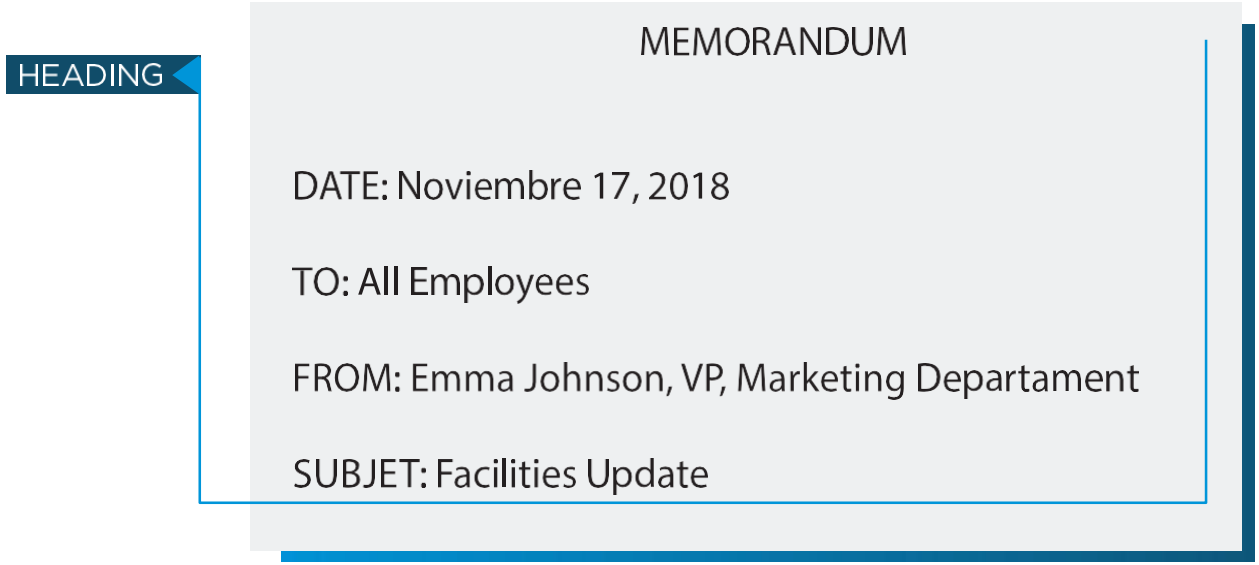

SALUTATION
Dear Ms. Price:
Thank you so much for taking the time to meet with me to discuss selling my handmade sweaters in your wonderful shop.
INTRODUCTION PARAGRAPH
DETAILS
As I mentioned in our conversation, I've been a customer of your store since I used my third-grade allowance to buy my very first pair of knitting needles. I'm honored that you'd consider selling one of my original creations at The Yarn Company alongside your own work.
We discussed a trial consignment arrangement in which a portion of the sales would go to the store. This is more than agreeable to me.
Let me know how you want to proceed. I'm available most afternoons at 555-555-5555, or you can email me at email@email.com, and I'll respond to your message ASAP.
CALL TO ACTION
CLOSURE
Thanks, and best,
SIGNATURE
Jennifer Wilson

A **memorandum** (also known as a memo, or "reminder") serves internal communications regarding procedures or official business within an organization.

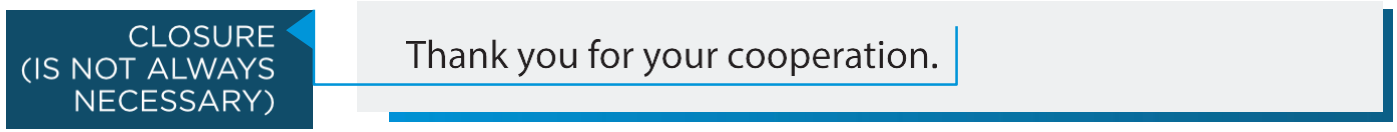

Unlike an email, a memo is a message you send to many employees, like your entire department or everyone at the company. You might need to write a memo to inform staff of upcoming events or broadcast internal changes.

The memo is conformed of 3 parts: **heading**, **body** and **closure**:

PURPOSE	I'm wriying to inform you that, over the next few weeks, our kitchen area will be under construction as we re-model.
DESCRIPTIVE BACKGROUND	As our company continues to grow, we feel it necessary to provide more communal dining space, and we are grateful to our facilities team for their hard work in making that happen.
CONCLUSION (CALL TO ACTION)	If you have questions or concerns regarding the re-model, you can access the full report here. In the meantime, we are sorry for the inconvenience. In between the weeks of December 1 - December 31, please use the kitchen on the second floor if you need a microwave. We will also keep that kitchen stocked per usual with snacks and soda

Business letters or emails differ from the memorandum in several attributes. For example: the scope, the formality, the salutation and signature, the length and the language. **Memos are for people within the same organization**, have fewer formalities, they do not use the greeting, and the signature is unnecessary. They are shorter, more simple and less formal than business letters or emails.

> **A business lunch** is a lunch with other business people or customers where a business is discussed. (Cambridge Business English Dictionary). The following are some tips to master the business lunch:

- **It's just business, nothing personal:** often, when we introduce food into the equation, people forget about the purpose of a meeting. Remember that you are there to accomplish something for your company. **It is NOT a friends reunion.**

- **Know your schedule and objectives:** before inviting someone to a business lunch, you should have a plan for what you want to discuss and defined goals for what you want to achieve.

- **Mind your manners:** show proper table manners. Make sure you only drink from your glass, you use the correct cutlery and you chew politely without talking with a mouthful of food.

- **Be present:** be sure that all your attention is on what your guest or host is saying. You won't be there all day, so you must offer the other person the undivided attention they deserve.

- **Keep them talking:** listen more than you talk. Nobody likes someone who always talks about themselves. People want dialogue, someone who listens and makes them feel as if the person with whom they are speaking cares about what they are saying.

❑ **No alcohol:** drinking impairs one's abilities, and you should be responsible. It's best to stick to the soft drinks.

There are different paths to invite someone to a business meeting, and to accept or reject the invitation. The tables show some illustrations:

INVITING
Would you like to... ?
Do you feel like... ?
How about... ?

SAY YES
That's a good idea.
Yeah, great!
I'd like that!
That's perfect!

SAY NO
Well, actually...
I'm afraid...
I'd love to, but...
I'm sorry, but...

A **business conference** is generally understood as a meeting of several people to discuss a particular topic. A forum throws innovative ideas, and experts exchange new information. Its purpose could be one of the following:

- **An academic conference:** scientists or academicians present research findings or conduct workshops to learn something new in their forums.

- **A business conference:** is held for people working in the same company or industry. They come together to discuss new trends and opportunities about the business or to the bond between colleagues.

- **A trade conference:** takes place on a larger scale. Besides business people, there are members of the public who come to network with vendors and made new connections.

Also, at a business conference, usually, there is a lot of social connection and entertainment. For example, live shows such as concerts, theatre plays or parties.

Remember to be formal and to use appropriate language. Although the environment may look informal, you are creating business relationships and contacts.

VIDEO

Please review the following video:

Making Contact

BUSINESS TRIP

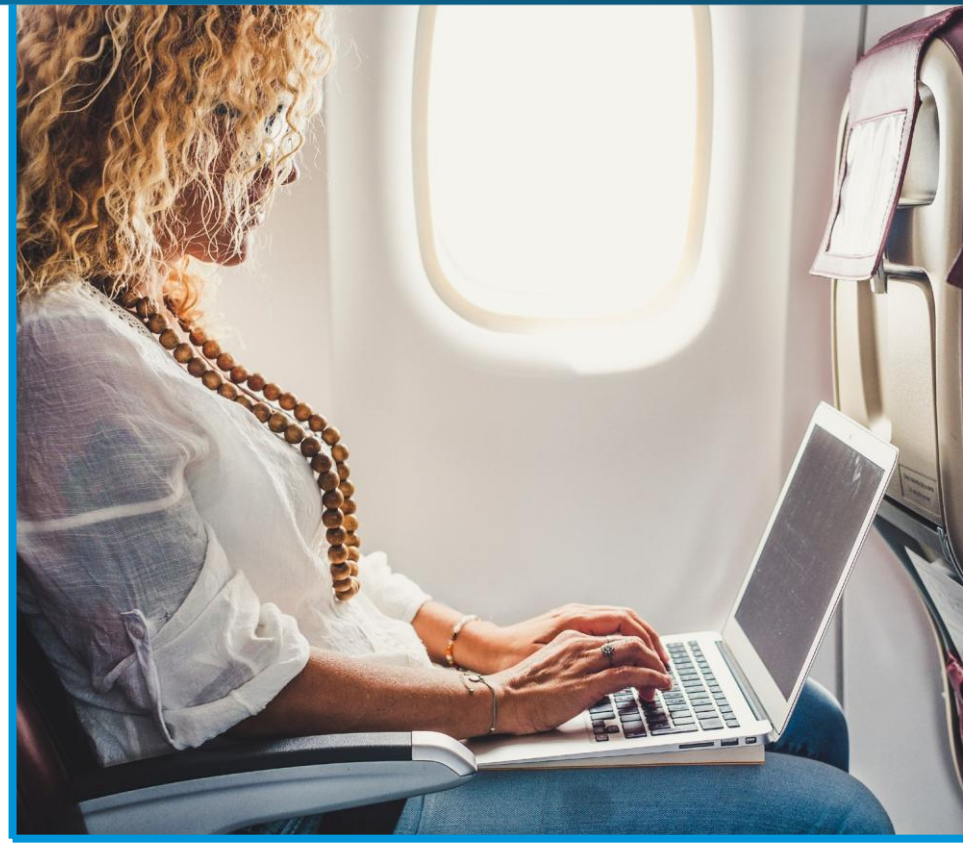

Your business may take you all over the city, country or the world. To get the most out of your business trip, you must pay attention to the following points:

- **Make travel and accommodation arrangements:** car rentals, airline tickets and hotel rooms. When you're planning the dates of a business trip, either nationally or internationally, consider religious and local holidays because businesses and restaurants could be closed.

- **Put together an itinerary:** for example, flight information, the hotel name, address, telephone number, and reservation number; meeting times and places, ground-transportation information, meal arrangements and scheduled entertainment.

- **Pack only what you need:** leave everything else at home. You have to take your laptop, cell phone, reports, contracts, brochures, clothes and essentials only.

❑ **Get your documents in order:** no matter where you go, you should take your identification that allows you to drive. If you're travelling out of the country, double-check the expiration date on your passport.

❑ **Have the right currency on a business trip:** lif you're taking a business trip overseas, be sure to stop in at your bank ahead of time. Get enough cash according to the currency of your destination. You will need to pay for small expenses before getting a chance to go to a hotel's or bank's exchange window.

Also, ask your bank or host whether your ATM card will work for getting your destination currency at the hotel where you'll be staying or at a nearby bank.

❑ **Ensure someone knows your trip plan:** give a copy of your itinerary to a colleague, and give another copy to a friend or relative. If something goes wrong, and you don't arrive back when you say you will, someone will be able to initiate a search with accurate information about you.

Furthermore, on a business trip, you certainly will need help. Either from your peers or, if you travel alone, by the locals. You may need help to ask for your flight, for car rental or only some indications to arrive save to the hotel.

Functional language to ask for help with some task:

- **I'm afraid I have...** (for example, an urgent meeting), **which means I can't...** (the activity).
- **Unfortunately, I have to...** (for example, an urgent meeting), **so, I can't...** (the activity).
- **I'm afraid I'm unable to / can't...** (the activity) **because...** (for example, an urgent meeting).

Nubia

I'm afraid I've had to go to an urgent meeting with a client, so can you phone the City Auditorium for me and tell them we need a projector to show the new promotional film? Tell them it needs to be in the main auditorium as part of the opening session.

Thanks, Julia.

LECTURES

Please review the following lectures:

Levels of Formality

Read the following sentences and fill in the blank lines with the correct answer with the concepts inside the box:

TRAVEL	JOURNEY	TRIP

- Business _____ account(s) for a large part of the airline's profits.
- I've just been on a _____ to China to look into sourcing from a new supplier.
- The reason is that our CEO will not be back from his _____ to Turkey before June 5th.

Read the sentences below and choose the correct option to each one:

LETTER (EMAIL)	MEMORANDUM

- Length in a _____ is more than that of a _____ .
- When writing a _____ there are very few formalities.
- Salutation and signature are a compulsory part of a _____ .

ACTIVITY 1

Press the button to download the activity:

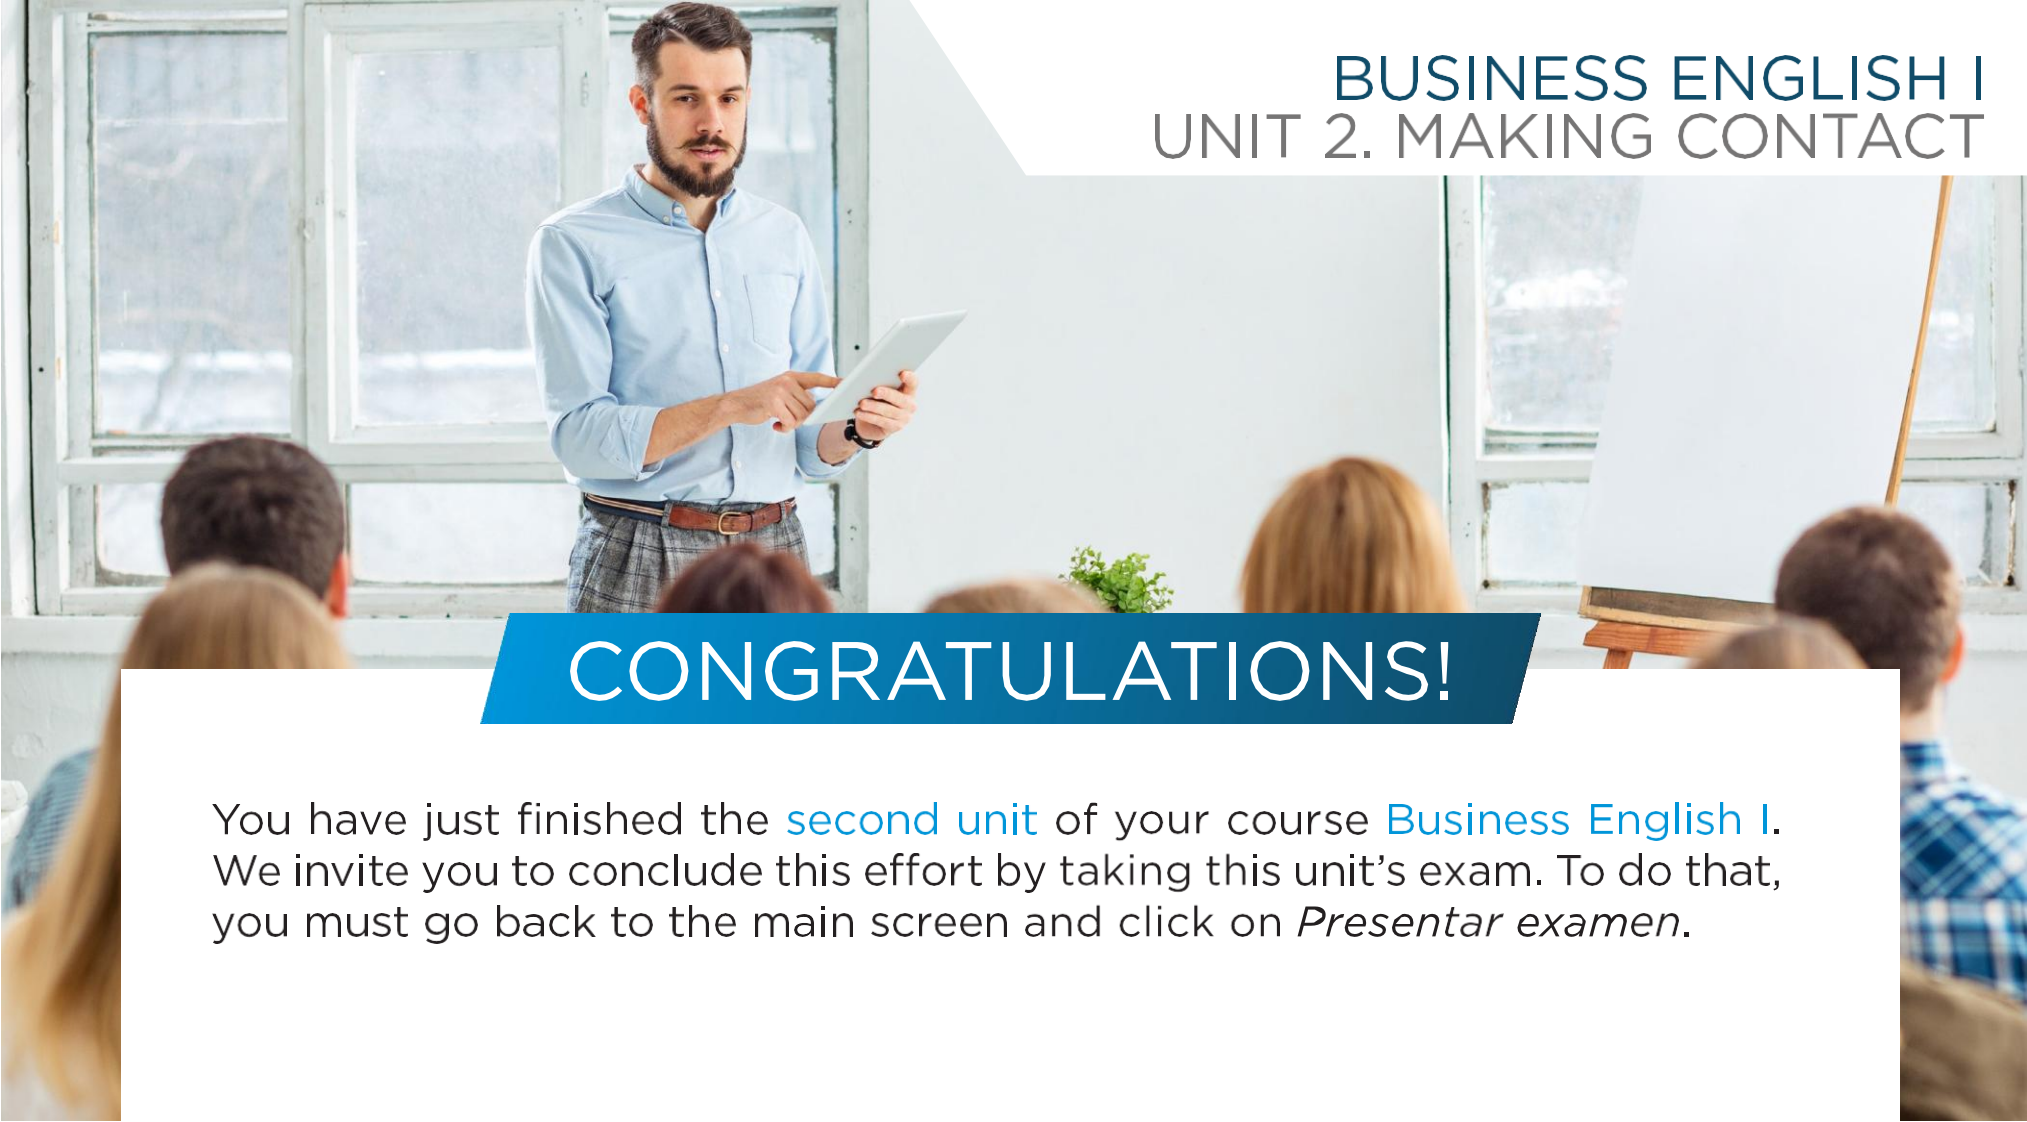

Press the button to submit the activity:

CLOSING REMARKS

This unit provides advice to travel on a business trip and illustrations about communicating with colleagues and peers. It is essential to consider the appropriate manners when you ask and accept or reject a business meeting. Sometimes people ask to be respectful and polite, but that is not a question but an indication.

CONGRATULATIONS!

You have just finished the second unit of your course Business English I. We invite you to conclude this effort by taking this unit's exam. To do that, you must go back to the main screen and click on *Presentar examen*.

UNIT 3.
WORKING WITH PROJECTS

SYLLABUS UNIT 3

3.1
Project pitch

3.2
Plans and feedback

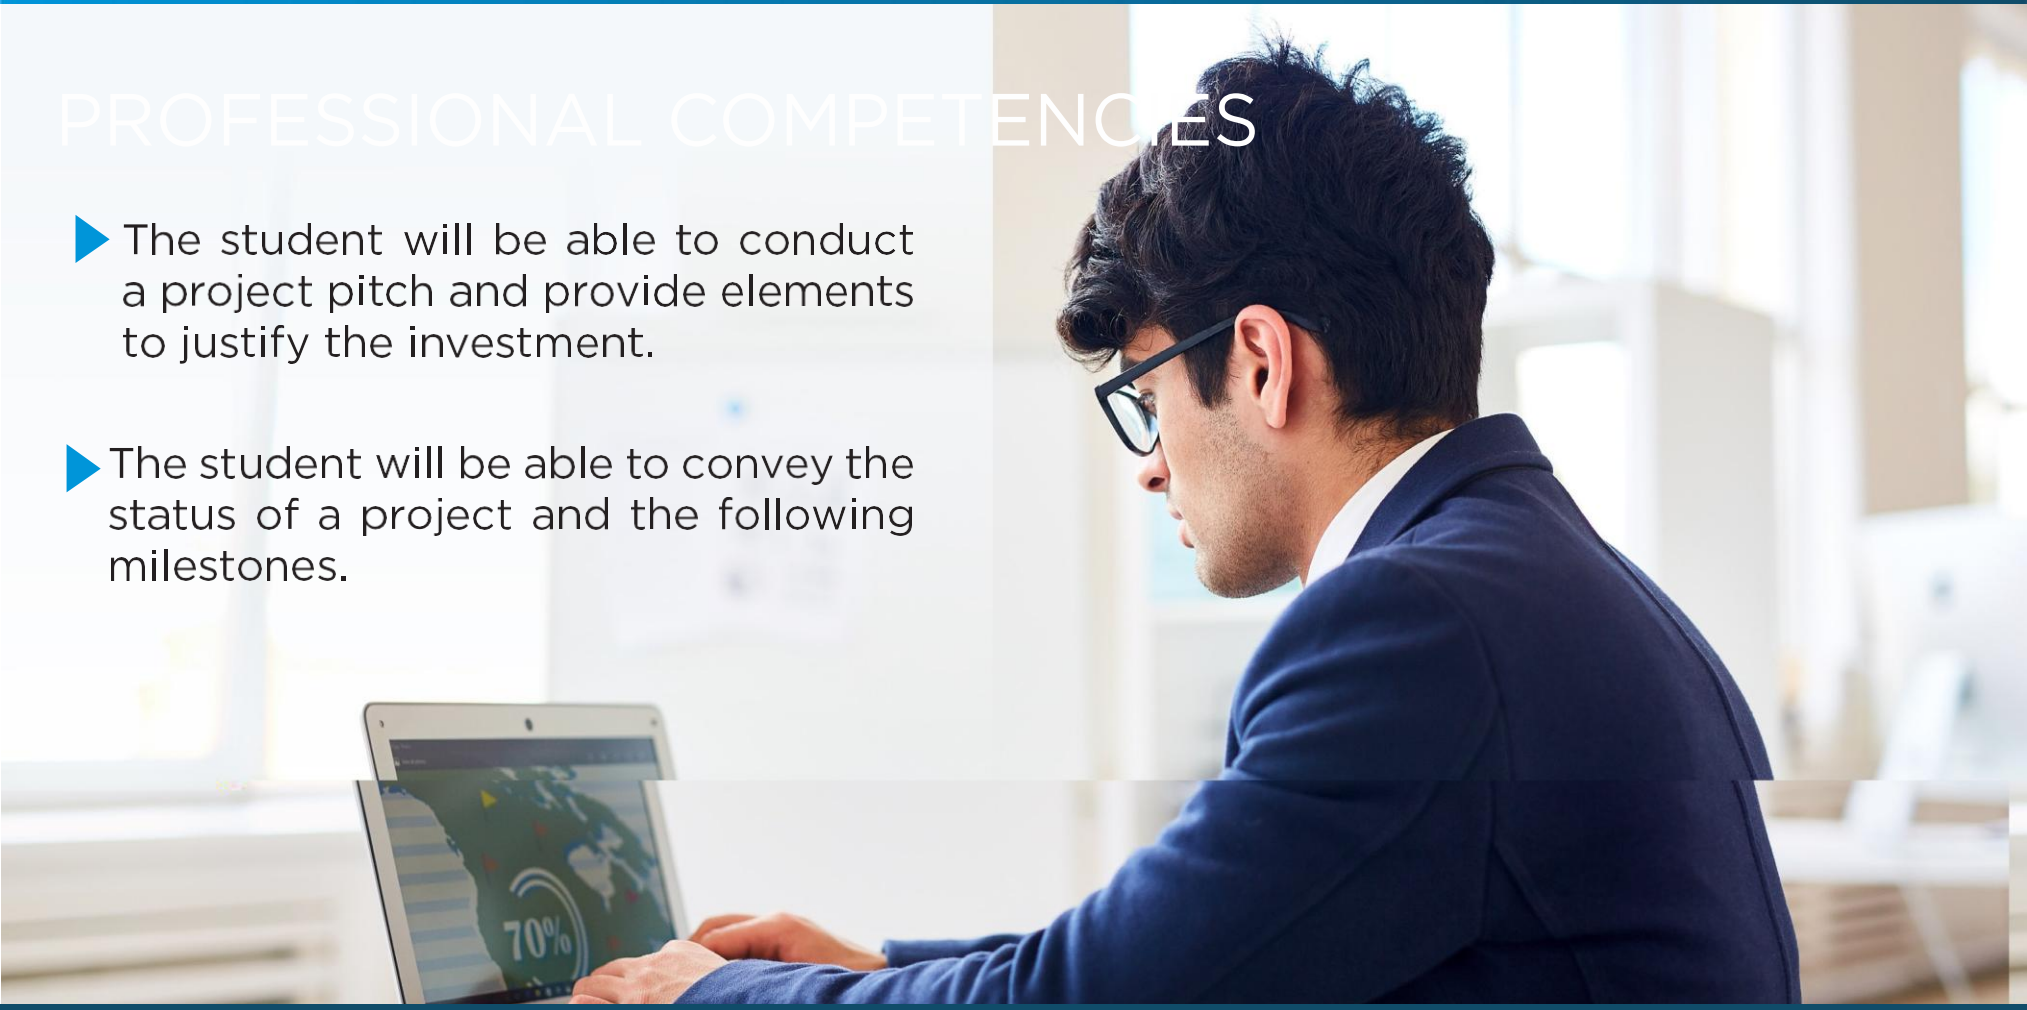

INTRODUCTION

This third unit will help you to consider how to “sell” your ideas in a project pitch. In particular, by using graphs, reports and key performance indicators. Furthermore, once you “have sold” the project, you will need to convey the timeline, budget and milestones.

PROFESSIONAL COMPETENCIES

- The student will be able to conduct a project pitch and provide elements to justify the investment.
- The student will be able to convey the status of a project and the following milestones.

PROJECT PITCH

A project pitch is a presentation where you mix and balance emotional and business needs. **The best pitch is concise, and tells a story.** The main objective is to persuade the decision-makers to choose your project among several others.

In particular, you need to start with a real-world problem. Then, you must provide context and provide an ideal solution. Later, you have to indicate how you will make that possible and close the pitch with further steps.

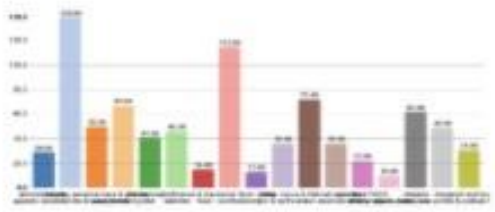

Some tools that will help you during the pitch are the **graphs**. These will provide hard data to convince your audience about your competencies, and that you are not suggesting an opinion but delivering a solution.

Graphs are a standard method to visually illustrate relationships in the data. The purpose of a **chart** is to present data that are too numerous or complicated to be described adequately into the text.

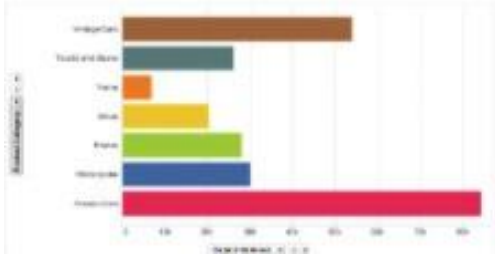

Generally, the most popular charts are: bar chart, column chart, pie chart and line chart.

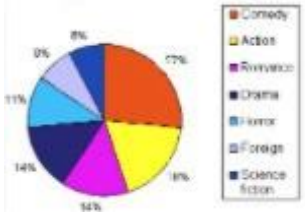

Vertical column chart

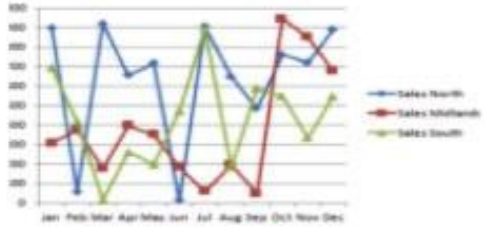

Horizontal bar chart

Pie chart

Line chart

To describe a graph, you may use the following verbs:

VERBS

- ❑ rise (to)
- ❑ increase (to)
- ❑ go up to
- ❑ grow (to)
- ❑ climb (to)
- ❑ boom
- ❑ peak (at)
- ❑ pick up
- ❑ fall (to)
- ❑ go down (to)
- ❑ decline (of)
- ❑ decrease (to)
- ❑ dip (to)
- ❑ drop (to)
- ❑ reduce (to)
- ❑ a slump
- ❑ level out
- ❑ no change
- ❑ remain stable (at)
- ❑ remain steady (at)
- ❑ stay (at)
- ❑ stay constant
- ❑ maintain the same level

To describe a graph, you may use the following nouns:

NOUNS

- ❑ a rise
- ❑ an increase
- ❑ growth
- ❑ a climb
- ❑ a boom
- ❑ (reach) a peak (at)
- ❑ a fall
- ❑ a decline (of)
- ❑ a decrease (of)
- ❑ a dip (of)
- ❑ a drop (of)
- ❑ a reduction (of)
- ❑ a leveling out
- ❑ no change

To describe a graph, you may use the following adjectives (to express size rate of change):

ADJECTIVES

- ❑ Big
- ❑ Dramatic
- ❑ Substantial
- ❑ Considerable
- ❑ Moderate
- ❑ Slight
- ❑ Small
- ❑ Fast
- ❑ Sudden
- ❑ Sharp
- ❑ Rapid
- ❑ Steady
- ❑ Gradual
- ❑ Slow

The following examples illustrate **how to use the previous verbs and nouns**:

- Cost **has risen** 10% in the last year, but our prices have remained stable.
- Sales **have gone down** this quarter, but we expect to pick up next quarter.
- Demand **fell** when we stopped advertising television.

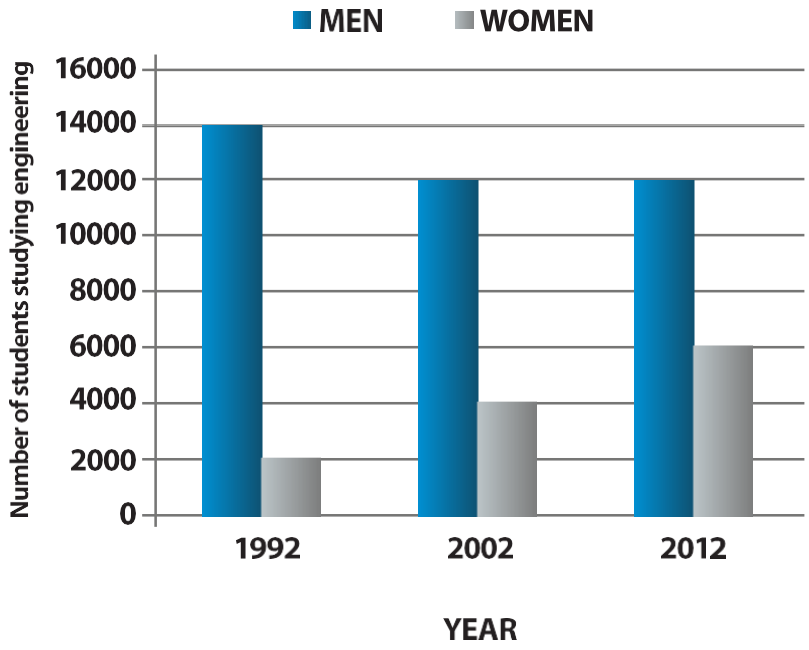

For writing reports about graphs, follow the next tips:

1. Start by saying **what the chart shows**, and the period.
2. **Describe the changes** as precisely as you can. Use data and numbers from the chart.
3. **Compare the information.** Talk about differences or similarities between the groups shown.
4. **Conclude** by saying **what the main trends or changes are**.

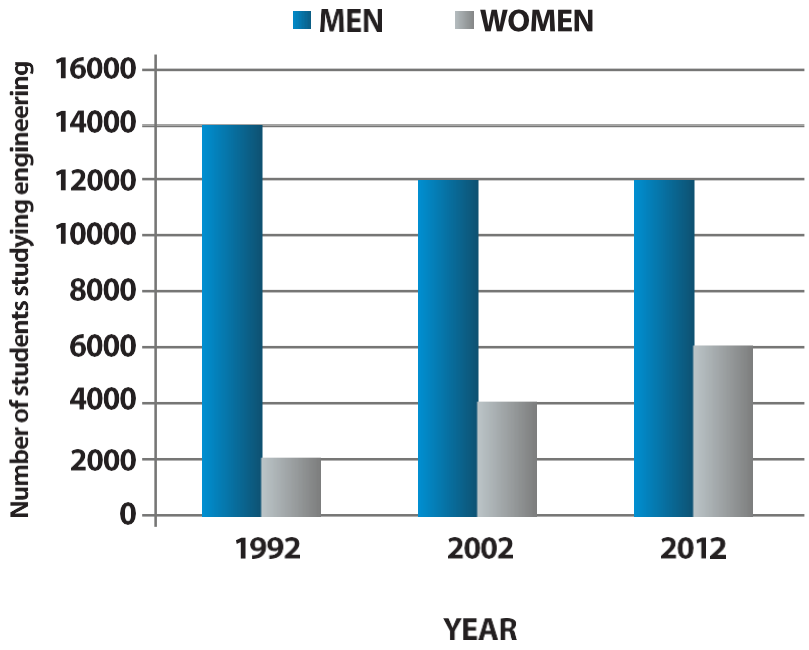

The following description is an example of how you can describe a graph:

The bar chart illustrates (1) the number of men and women studying engineering at Australian universities between 1992 and 2012 at 10-year intervals.

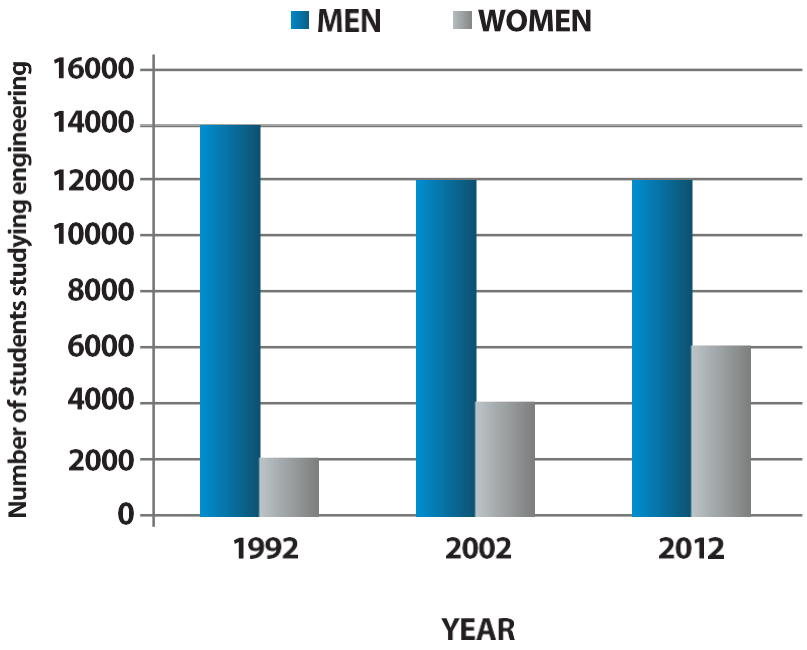

The number of male students fell slightly from 14,000 in 1992 to 12,000 in 2022 (2), and then remained level through the following decades.

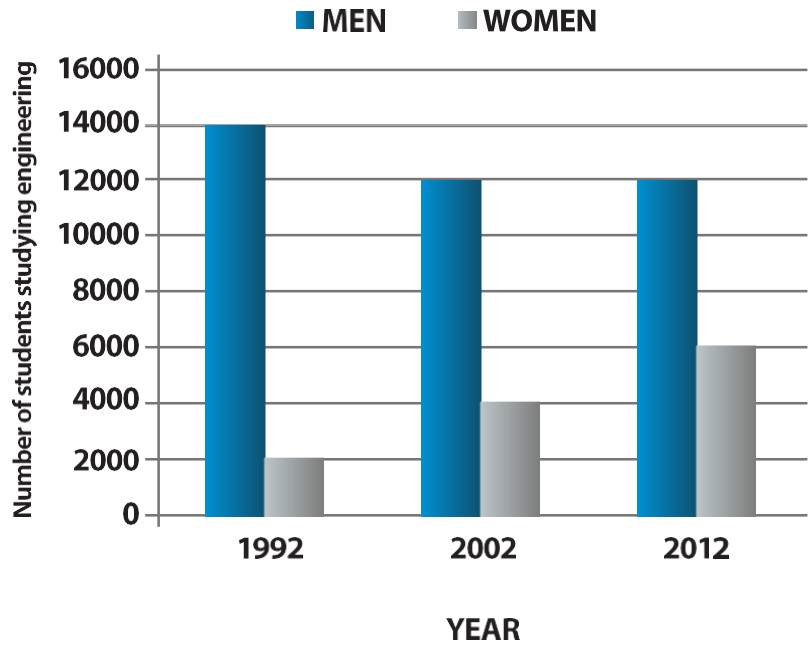

The number of female students is **relatively low**, starting at 2,000 in 1992. **However, while the number of men decreased, the number of women increased (3)**. Female students grew steadily by 2,000 each decade. This growth led to a rise in the total number of engineering students from 16,000 to 18,000 in this period.

Men continue to make up the majority of students. However, the proportion of female students increased sharply in this period. In 1992 there was one woman to every seven men. By 2012 this had narrowed to one woman to every two men.

Overall, we can see a clear upward trend (4) in the number of female engineering students in Australian universities, while the number of males students seems to have levelled off.

VIDEO

Please review the following video:

Working with Projects

PLANS AND FEEDBACK

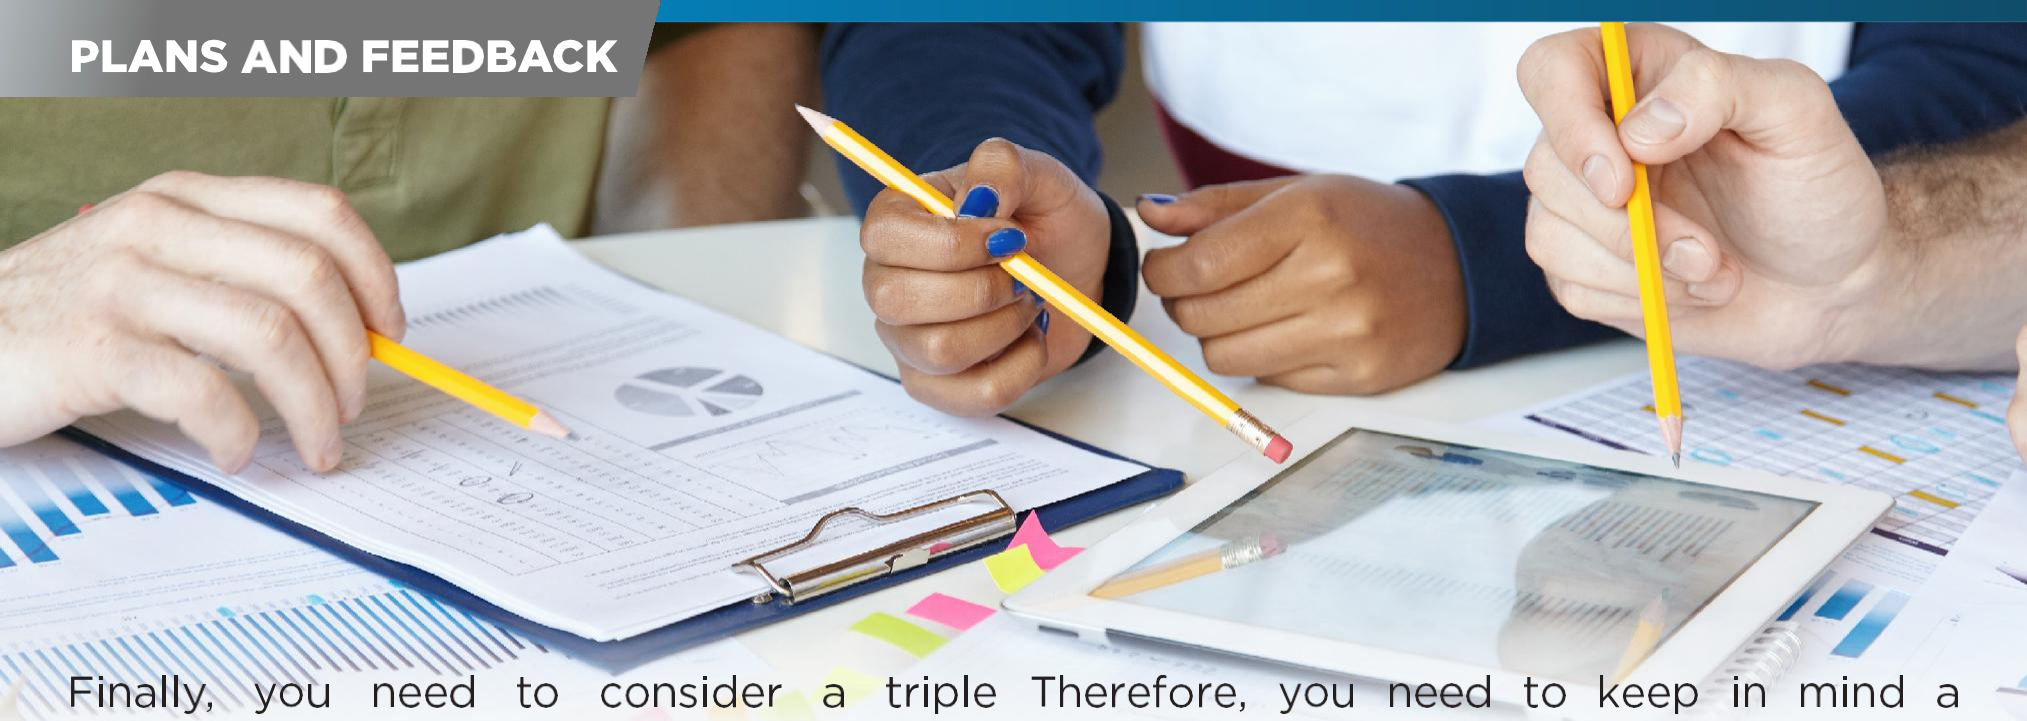

Once the pitch is successful, you need to **start planning the project**. You must consider the following:

- ❑ Stakeholder needs
- ❑ Project objectives
- ❑ Deliverables & assumptions
- ❑ Due dates & milestones
- ❑ Project schedule
- ❑ Risk assessment
- ❑ Communication plan

To be successful, think in the following actions that cover all the **phases** of project management. Then, imagine what elements are essential in each stage:

- ❑ Plan
- ❑ Analyse
- ❑ Design
- ❑ Implement/Execute
- ❑ Control
- ❑ Close

Finally, you need to consider a triple constraint which includes: **time**, **scope** and **budget**. Those three elements correlate with the quality of the project. By reducing one of them, the quality will also present a reduction.

Therefore, you need to keep in mind a **schedule baseline**, a **cost baseline** and a **scope baseline**. These baselines will be very helpful for performance review sessions.

A **performance review** (also called a performance appraisal or performance evaluation) is a formal assessment in which managers evaluate an employee's work performance, identify strengths and weaknesses, offer feedback and set future performance goals.

The most important part of review sessions is the feedback that the stockholders provide.

The feedback addresses different points:

- Specific activities
- Full role
- Team relationship
- Customer service

A 360-degree feedback provides input on employee's performance from several perspectives. A typical 360-degree assessment would include information from an employee's supervisor, peers, subordinates and possibly its clients and vendors.

Read this extract from a report and put the verb into the correct tense:

Three years ago, Dairy Queen (DQ) _____(SPEND) $75,000 DLLS on staff training. The main reason for spending that money was that the company _____ (HIRE) 50 new employees who _____(NEED) training.

Recently, DQ _____(SIGN) for a big project in Mexico, and now, staff need to learn new working methods. For this reason, DQ _____ (INCREASE) its training budget for next year at $200,000 DLLS.

ACTIVITY 2

We invite you to do the following activity:

Press the button to download the activity:

Press the button to submit the activity:

CLOSING REMARKS

This unit explains the relevance of a good project pitch. More importantly, it argues why to convey the message with hard data may make the difference to obtain or not the project. Also, this unit provides suggestions about roles defined during a project. Furthermore, it includes elements that are the pillars of the quality of the final product. Those elements are time, scope and budget.

BUSINESS ENGLISH I
UNIT 3. WORKING WITH PROJECTS

CONGRATULATIONS!

You have just finished the third unit of your course Business English I. We invite you to conclude this effort by taking this unit's exam. To do that, you must go back to the main screen and click on *Presentar examen*.

UNIT 4.
EXPLAINING SOFTWARE

SYLLABUS UNIT 4

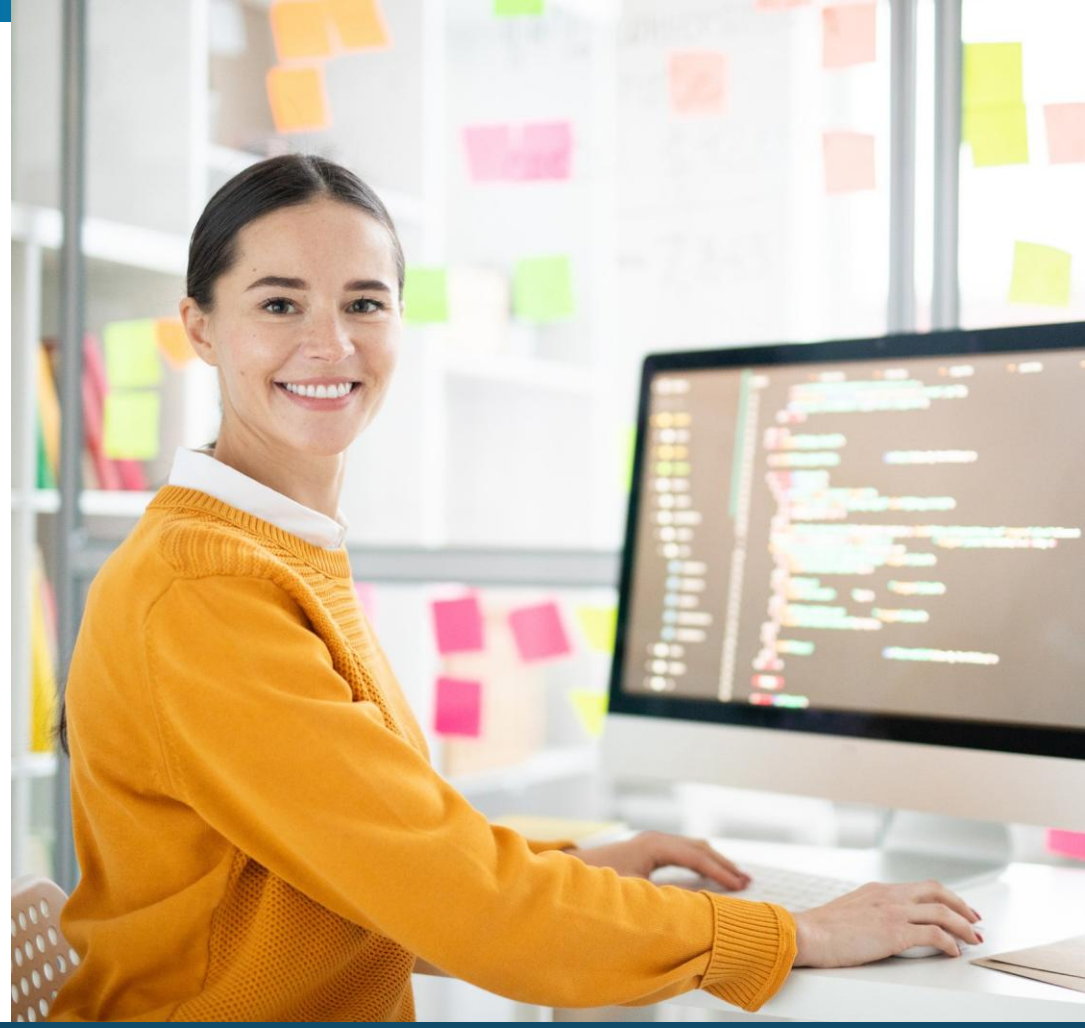

4.1 Interfaces and devices

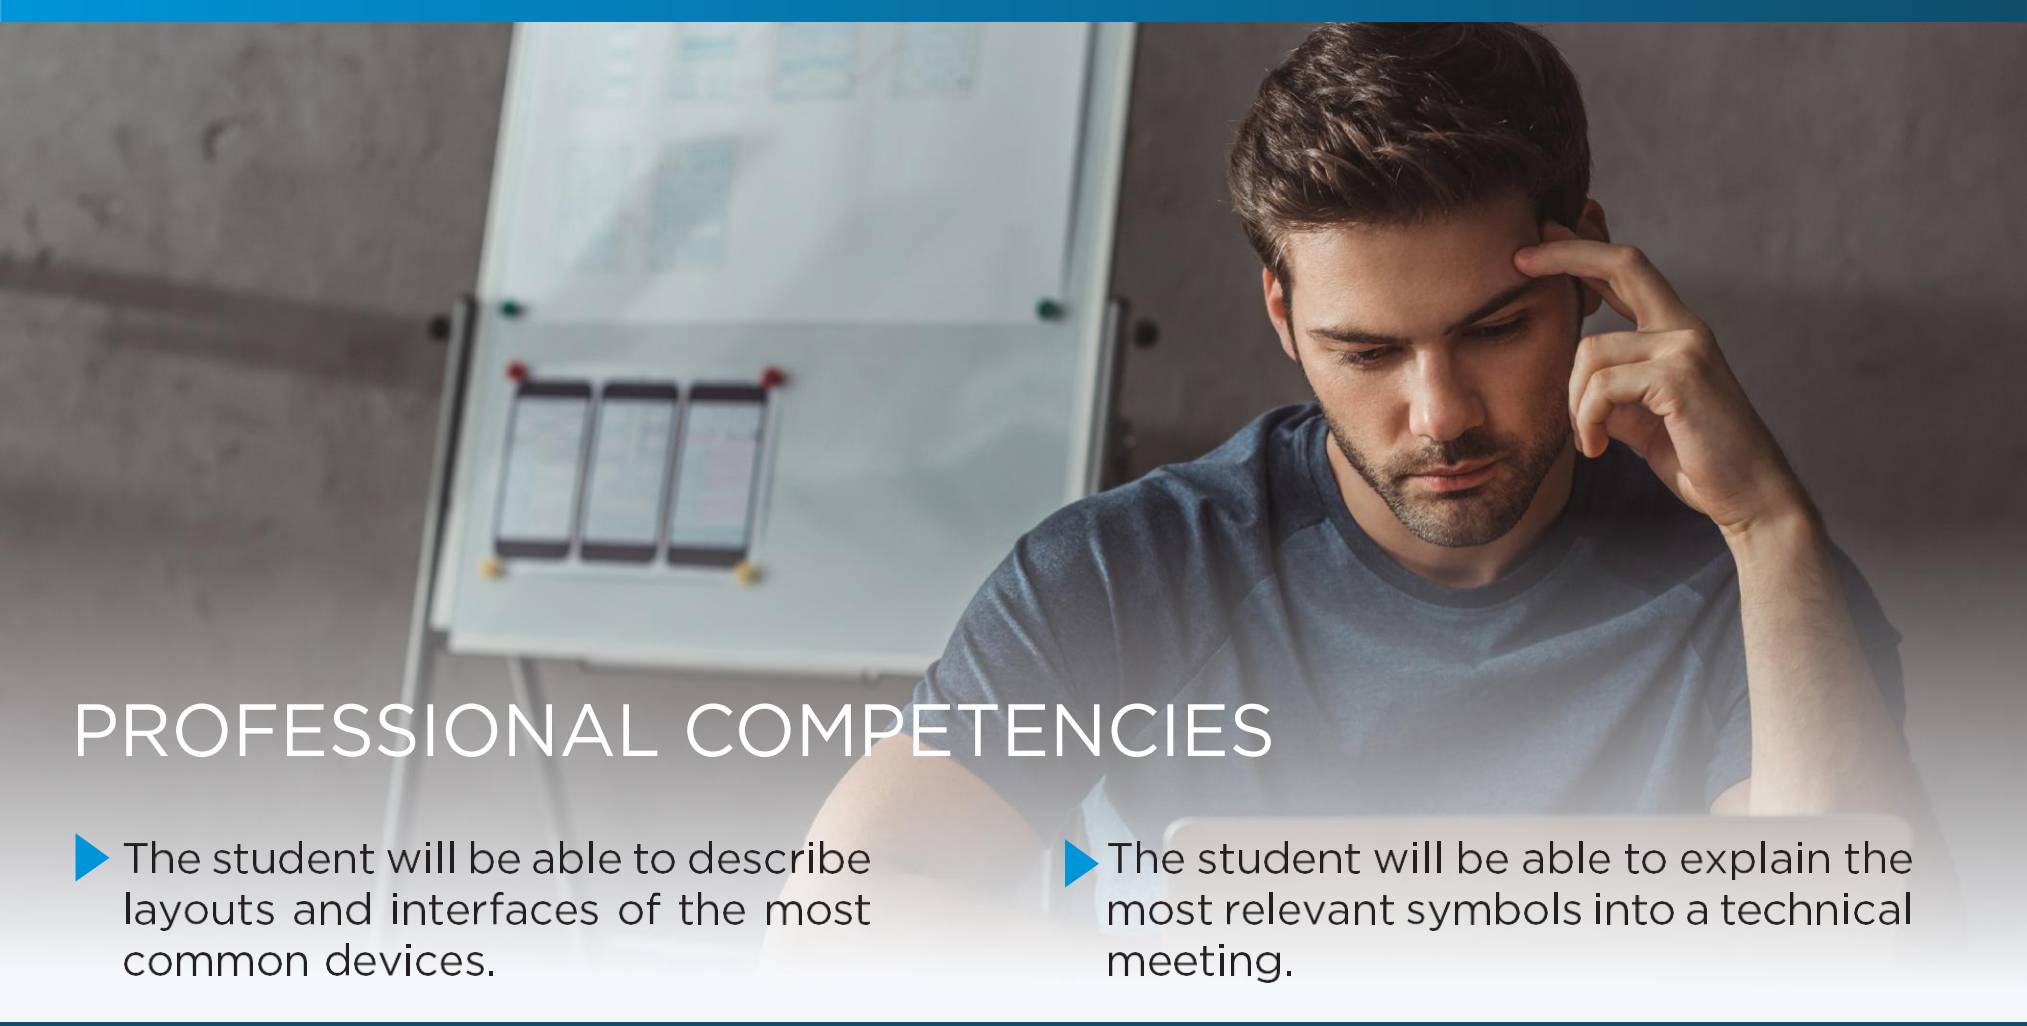

4.2 Technical vocabulary

INTRODUCTION

This fourth unit will enhance your vocabulary about technical elements that are common in Software Engineering meetings. Sometimes, when you talk with stakeholders such as business staff, IT staff or investors, you need to describe your project's interface, the processes or the code. Therefore, this unit will give you the tools to be successful in those meetings.

PROFESSIONAL COMPETENCIES

- The student will be able to describe layouts and interfaces of the most common devices.
- The student will be able to explain the most relevant symbols into a technical meeting.

INTERFACES AND DEVICES

Independently of the device that you are using, there are **primary sections** that you will need to describe in an **interface**. Those are:

- ❑ Header
- ❑ Sidebar
- ❑ Main
- ❑ Navigation bar
- ❑ Footer
- ❑ Left/right menu
- ❑ Carousel banner

To indicate where those components must be or how they must look and feel, you should provide the following information as much as you can:

- ❑ Size
- ❑ Colour
- ❑ Width
- ❑ Height
- ❑ Columns layout
- ❑ Distribution

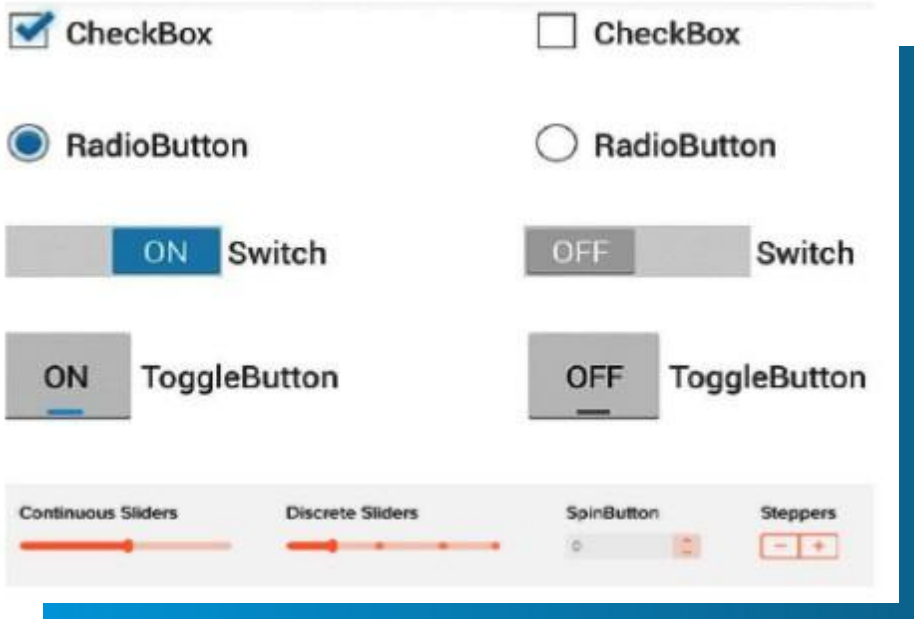

The components and their distribution depend on whether the devices are widescreen or narrow screen. Furthermore, according to their operating system, their toolbars and buttons will differ. Some examples are:

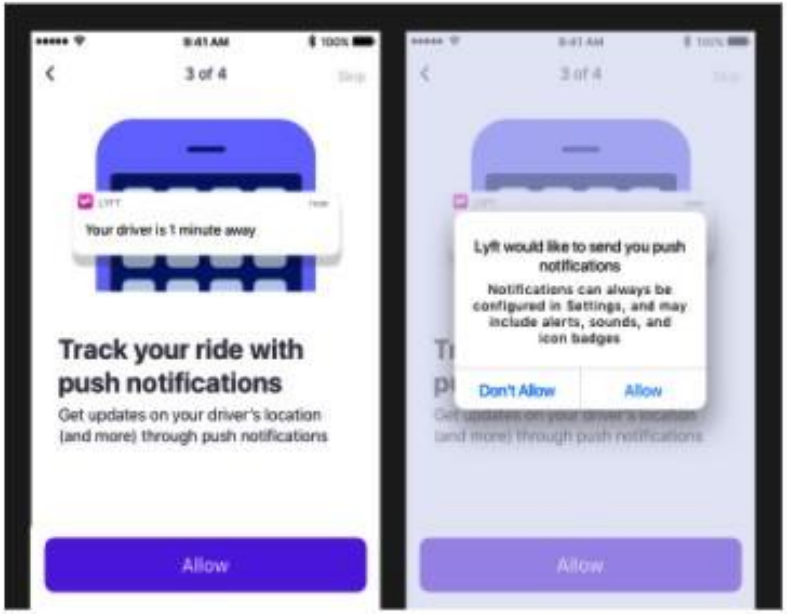

- ❑ WIFI, GPS or Battery signal level
- ❑ Home
- ❑ Back
- ❑ Recent apps
- ❑ Status or navigation bar

Nevertheless, everyday, items that almost every system requires are the **form elements**. Some illustrations are the following ones:

Alerts

Modal dialog box

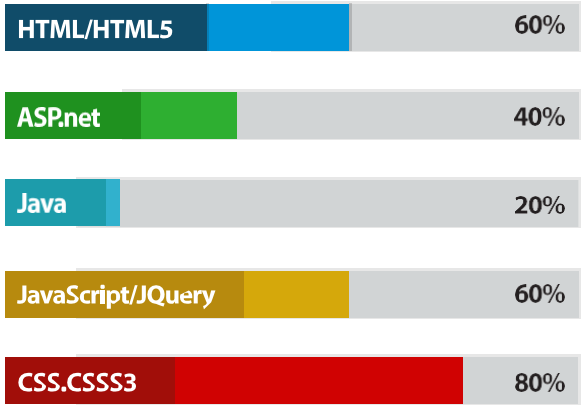

Date and time picker

Search box

Progress bar

Visual emphasis / Visual hierarchy

Breadcrumb

VIDEO

Please review the following video:

Explaining Software

Finally, the following **symbols** are in almost every code. Therefore, it is wise to dominate them to be able to present and discuss a software algorithm in a technical meeting:

SYMBOL	NAME	MEANING / DEFINITION
=	Equals sign	Equality
mod	Modulo or remainder operation	The remainder of 5 divided by 2 is 1
>	Strict inequality	Greater than
<	Strict inequality	Less than
≥	Inequality	Greater than or equal to
≤	Inequality	Less than or equal to
.	Period	Decimal point, decimal separator

SYMBOL	NAME	MEANING / DEFINITION
( )	Parentheses	Calculate expression inside first
[ ] or <>	Square or angled brackets	Calculate expression inside first
+	Plus sign	Addition
−	Minus sign	Subtraction
*	Asterisk	Multiplication
×	Times sign	Multiplication
•	Multiplication dot	Multiplication
÷	Division sign	Division
/	Division slash	Division
==	Equal to	Equilibrium

SYMBOL	NAME/DEFINITION
===	Equal value and equal type
!=	Not equal
!==	Not equal value or not equal type
>=	Greater than or equal to
<=	Less than or equal to
“	Quotes
‘	Single quotes
-	Hyphen
—	Dash
_	Underscore

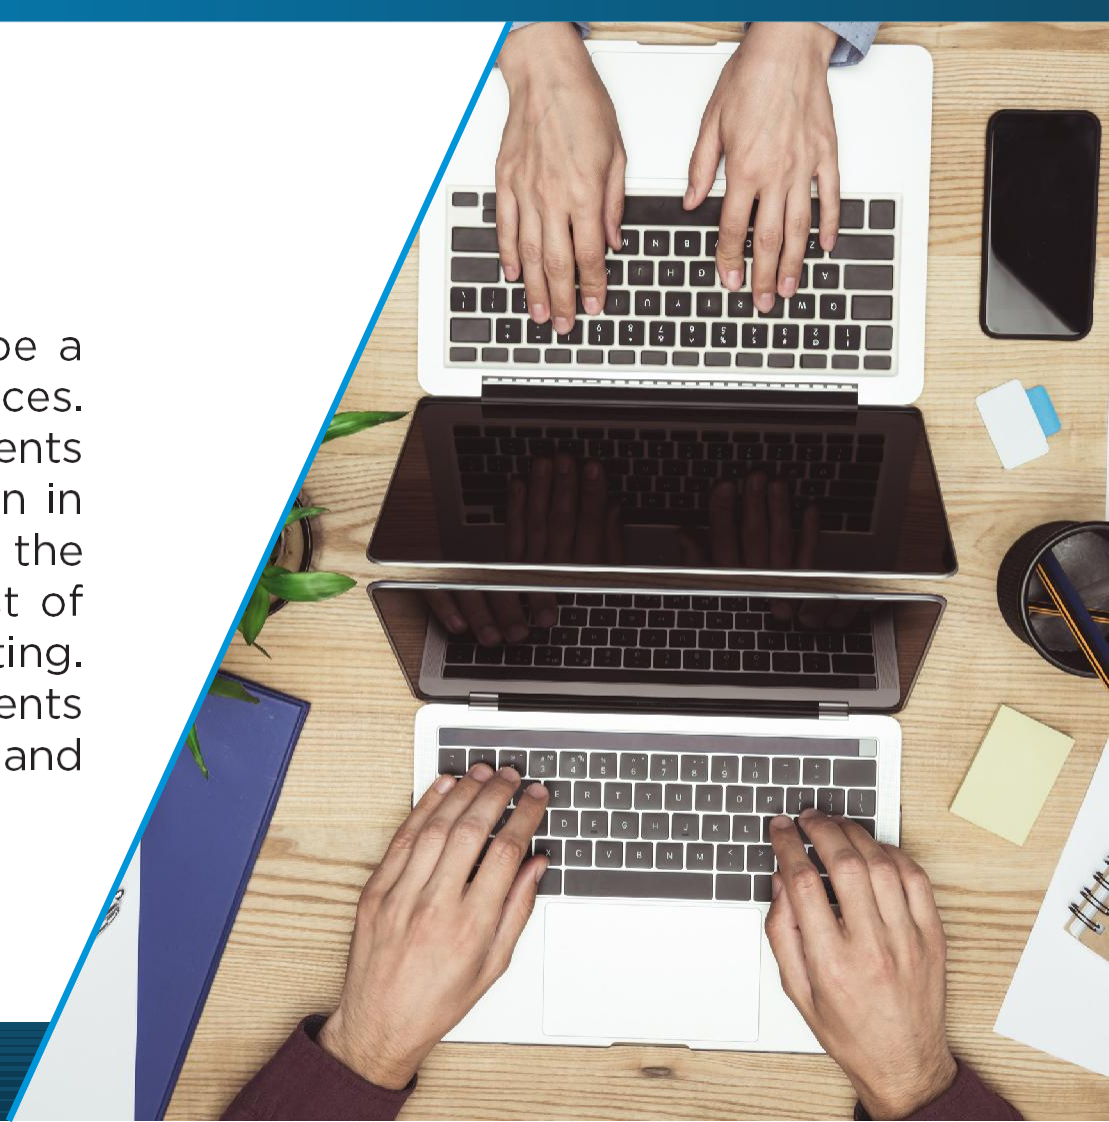

First, go to template monster:

Then, explain the graphic interface of at least two templates and try to convince your friends to buy one based on their characteristics.

CLOSING REMARKS

This unit provided elements to describe a graphic user interface in different devices. Furthermore, it exemplified components from a form. Features that are common in almost all the forms, independently of the device. Finally, the unit illustrated most of the symbols required in a technical meeting. Therefore, this unit provides the arguments to be successful in both business and technical sessions.
