Development

Context:

Your work may take you to different cities, countries, and other places in the world. It is important to plan and make the right travel accommodation arrangements. Sometimes bosses are open to hearing about symposiums that could help us improve our work performance.

Culiacán

Business trip

Why should we visit Culiacán?

We will be going to Culiacán,
since that is where the training facility is located,
equipped with all the necessary tools to
complete the optometrist certification program.

We have a dedicated training floor in the Banorte Tower

There are several stations set up,
each equipped with all the tools we'll need

Why Culiacán and not somewhere else?

Coppel was founded in Culiacán, Sinaloa, in 1941 by Luis Coppel Rivas and his son Enrique Coppel Tamayo. They started with a store called "El Regalo"

With an investment of 260 million pesos and projects ranging from commercial infrastructure to the revitalization of public spaces, Group Coppel maintains a strategy of active engagement in Culiacán, the city where it began operations in 1956

Parques Vivos 4x1

An initiative that transforms public spaces in collaboration with business leaders.

Renovation of Green Spaces

Concrete benches, streetlights (spotlights), trees, and picnic tables have been installed in various areas.

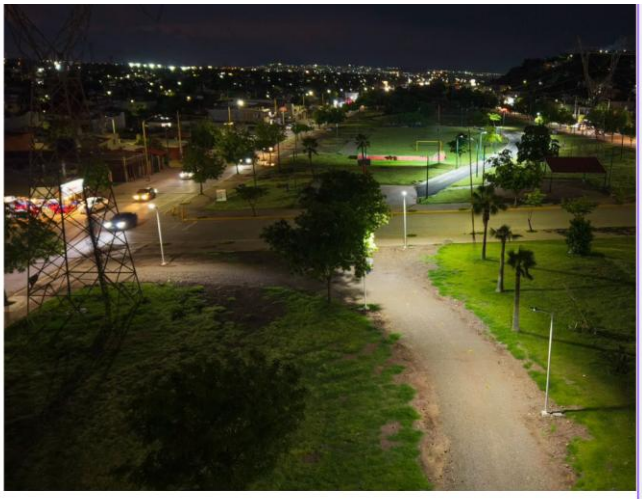

Ecko Unltd. and Coppel are reopening the Skatepark at Parque Constitución in Culiacán

As part of Ecko Unltd. and Coppel's commitment to promoting urban sports and returning recreational spaces to the community, the skate park at Parque Constitución in Culiacán was renovated this month.

Lineal Park

Renovation work has been carried out on community spaces in Culiacán, including infrastructure upgrades.

Conclusions

We'll be going not only to get the tools we need to complete the certification, but also to learn a little more about the company's history and how dedicated they are to renovating public spaces through multimillion-dollar investments in the city where they first began operations.

Here are a few reasons why we should go to Culiacán to take the courses: the necessary infrastructure for certification is located right there, and we'll also have the opportunity to see firsthand all the infrastructure the company has invested in to improve public spaces, as well as its commitment to improving the city where it all began.
