## Introduction.

In this activity, we will be preparing a report on our business trip to Culiacan, which will include the date of the trip, the number of days we were away, as well as the destination and purpose of the trip. We will include the itinerary of the activities we will carry out during the trip—which we created in the previous activity—as well as the goals achieved during the trip and various tips, notes, or recommendations we have about the trip. This information will be presented in a table as part of the activity. We will also write a summary of our experience, covering what it was like before, during, and after the trip. This will allow us to offer some comments on what we recommend bringing on the trip, how we can improve certain aspects, and make recommendations for future travelers, as well as provide feedback on transportation or even accommodations.

## Description

In this activity, we will continue with the itinerary from the previous activity, where we created a table outlining the activities that will take place each day, as well as the time each activity will take place on its respective day, along with recommendations for places to visit on the free day and the departure time, since there is plenty of time to go out for dinner or visit a place nearby, this is to help us plan for any future business trips. In my case, I'll draw on my experience from a business trip for an optometry course a few weeks ago, so we'll practice with schedules, times, dates, and activities to optimize the business trip, as well as recommendations for each activity or for the trip to the city where the training will take place, the purpose of the trip, the expected outcomes, and a summary of the business trip—in my case, for the certified optometrist training, which lasts approximately 11 days.

## Justification

Through the activities we've done so far, we've learned how to create a business travel plan that explains why we should visit a particular city or why we should conduct the trip in that part of the world, why we should travel to that city for the business trip, what benefits we could gain from the trip, why it is necessary to do it there, and what are the reasons we decided to go to that place. We created an itinerary to organize our time, length of stay, and to plan the activities for each day, including the specific times when the activities will take place, as well as specifying the exact locations where the activities will be held at their respective times, covering all the days of the course or business trip, as well as making recommendations to streamline the travel process and optimize routes, activities, and accommodations without skimping on transportation, since it is necessary to have personal and safe transportation for all employees.

**Development.**

The optometry course will take place on April 20 at the Banorte Tower from 8:00 to 8:15 a.m. Therefore, we recommend arriving at the hotel the day before so that rooms and roommates can be assigned. We recommend traveling on the evening of the 18th so that you can arrive at the hotel on the 19th and have the rest of the day to rest in your assigned room.

The optometry course will be held on Monday, April 20. You must wear the uniform for your current department or smart casual attire, black shoes or sneakers, and wear your ID badge at all times during the course. Transportation will only wait for you for 5 to 10 minutes at the designated location; if you are late, it will leave. The first 3 days will be theoretical, with exams on optometry knowledge; the rest of the course will be practical.

Once the courses are completed, grades will be issued and certification results will be announced. The training will end on April 29, and check-out must be completed on April 30 to record the employees' departure. We recommend that you activate your GPS and notify the manager once you have arrived at your destination.

| | |
|---|---|
| Year and month | May 19th of 2026 |
| Number of days | 11 days |
| Destination | Culiacan Rosales, Sinaloa |
| Purpose of travel | Optometrist certification |
| Activities | see the itinerary below this table |
| Accomplishments | We learned how to diagnose refractive errors in patients and how to recommend appropriate prescriptions and additions for eyeglass lenses |
| Challenges | get up between 6 and 7 a.m. for the hotel's free breakfast |

| | |
|---|---|
| Tips, notes and special remarks | Travel at night if it's a long trip<br>Pack plenty of clothes—laundry is too expensive<br>Bring a blanket<br>Keep real-time location tracking turned on if you go out |

| Day | Time | Activity |
|---|---|---|
| Day 1 | All day | Arrival at the Hotel San Marcos Grand locate in Address: Prol. Álvaro Obregón 51 Norte, Primer Cuadro, Centro, 80000 Culiacán Rosales, Sin. to register all staff and assign rooms |

| | 12 pm | The company's shuttle picks everyone up and takes them up at Panama Restaurant |
| | 12 pm to 1 pm | Lunch an Panama Restaurant |
| | 1 pm | The company's shuttle picks everyone up and takes them up at |

| | | |
|---|---|---|
| | | the Banorte Tower |
| | 1 pm to 5:30 | Practical Optometry course, Review of exams and grades |
| | 5:30 pm | The company's shuttle picks everyone up and takes them up at the Hotel San Marcos Grand |
| | | After arriving at the hotel, the rest of the day is free (recommended visit) |

The table above shows the daily schedule. Each day, the company will take you to the training room, take you to a nearby restaurant for lunch, and then return you to the training room and back to the hotel. Once you arrive at the hotel, you'll have the rest of the day free to go out for a meal or visit a place. We've included recommendations for places like parks and churches, since there are many places to have dinner near the cathedral and parks.

## Conclusion.

in this activity, we prepared a report on our business trip. During the 11-day training program, there is a strict schedule that outlines the activities for each day of the itinerary. We wrote some recommendations for the trip, including places to visit after each day of the course and on the day off. We created these different tables showing the length of stay, the places where we will be staying, the address of the training room, the activities to be carried out each day, the challenges or expected achievements in the optometrist certification, and some difficulties encountered in the certification courses, as well as highlighting some recommendations for places to visit along the itinerary and tips for the employee taking the business trip. In our trip report, we could have written a detailed account specifying the activities carried out and the places visited each day, but we chose this format because most of the time the itinerary consisted of traveling from the hotel to the training room, then to the restaurant, back to the training room, and back to the hotel, so the company handled the transportation in this manner.
